It's a Jungle Out There

Poachers

Increasing \$ + Tight Market + Poacher Behaviour

VS

Gamekeepers

Lift the bar everyday or you'll get left behind

Analyse and Strategise now: You CAN be ahead of this

It's a Jungle Out There

Poachers

- Big \$\$ (+ 20-40%) & big landscapes
- Selling the instant fix to 20-35 year olds
- Pumping up egos & dreams
- Weighting potential heavily against ability
- Junior Staff going to senior roles that they are not ready for
- Capitalising on Covid fatigue
- Catastrophising the challenges of current hybrid model
- Not just the big players: start up's, boutique firms, security, security, security

Increasing \$ + Tight Market + Poacher Behaviour

=

The Perfect Career Storm is Brewing

VS

Gamekeepers

- Excellence in all aspects of Employee Lifecycle
- Engagement is critical
 - Policy Platform
 - Hybrid work
 - Culture
 - ESG focus
 - Diversity & Inclusion
- Societal currency – your 'WHY + HOW'
- Authenticity at every level and in every interaction
- These are not 'differentiators' – they are your 'Ticket to Play'

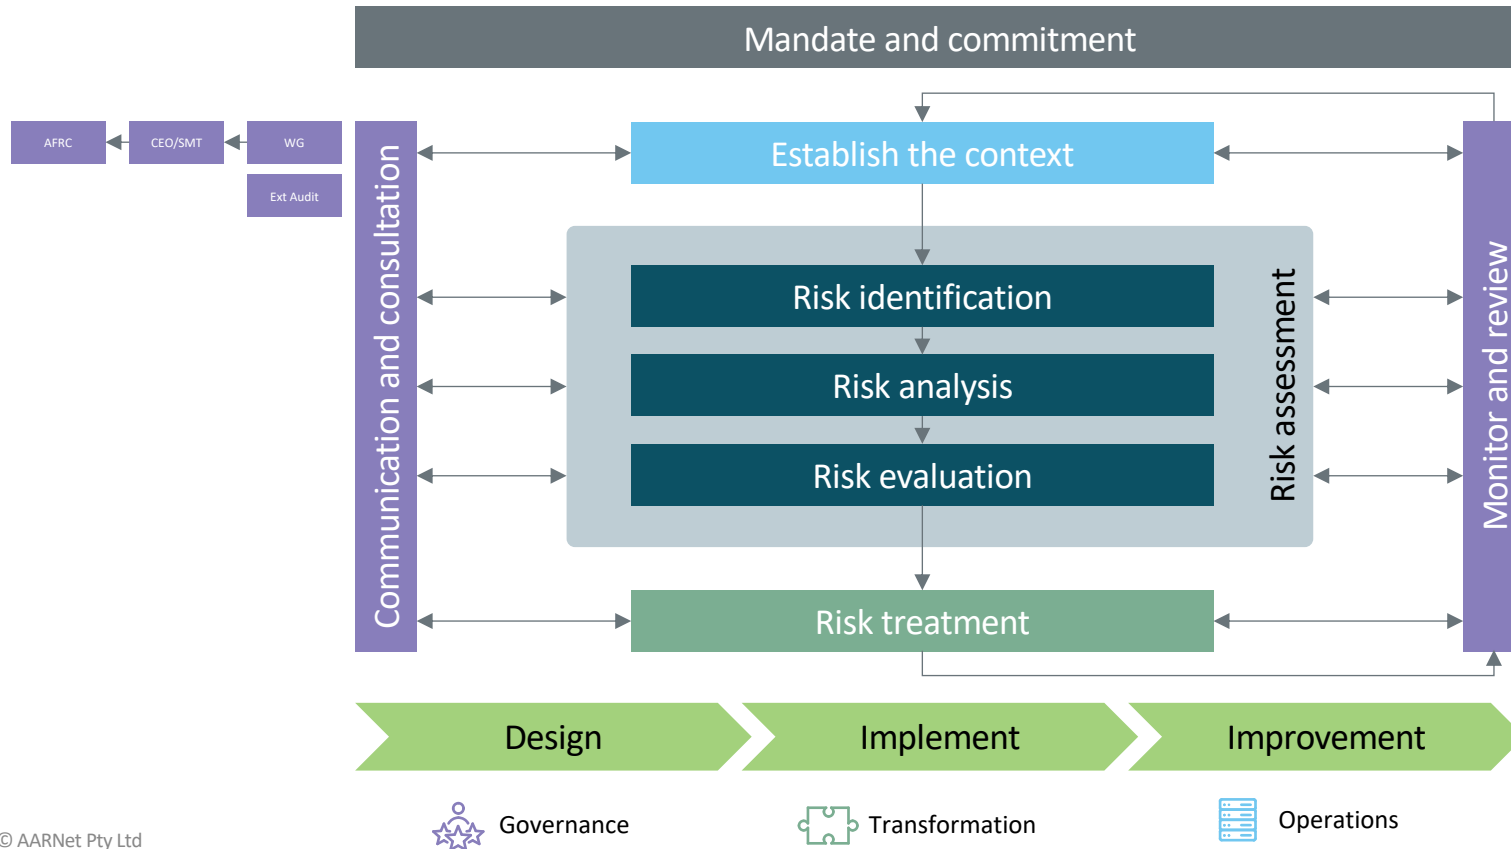

Lift the bar everyday or you'll get left behind

Analyse and Strategise now: You CAN be ahead of this

A way forward

Strategies from the AARNet cyber team

Strategy one – lead with risk and ‘top down support’

Strategy two – shifting left

Policies and standards

Security testing and checks

Guidance, advice and support

Strategy three – identify champions

FW: Phishing 2023 reminder to be alert

To

Cc

 This message was sent with High importance.

Good morning VIC Team,

Speaking to a couple of the team this morning I thought I'd share this Phishing awareness emails to the VIC Team.

A quick call out to @Tim who received the phishing email over the weekend allegedly from . When Tim noticed this didn't feel right he called myself to check and see how to report this to our security team. Great works Tim. One team.

Not sure how many of us in the IDG Team have received the phishing email/s over the weekend or since we have returned from a much-needed break. This is a good reminder that the bad guys and girls who are sending these emails are always working and will try and test us on weekends, holidays and anytime in-between.

Please also see below for how to report via email to apl@aar.net.au and via the report message button. Fingers crossed no one has taken the bait /clicked the links. If you have clicked the link/s please follow up with the support teams and see below instructions. Please also know were all human and everyone can be phished.

Americans. So in light of this, as a service to the public we asked people...

Strategy four – reporting, metrics & communication

Example 1 – Passwords/passphrases

Scenario: Human fatigue when users need to remember numerous or complex passwords

Behaviours:

- Store them insecurely (e.g. post-it note)
- Password re-use
- Increased service management and frustration (e.g. locked accounts, forgotten passwords)

Response:

- Increase password length/complexity but increase the expiry period
- Target security controls for privileged accounts or protected network segments (as opposed to 'ALL')

Example 2 – automate to remove the human and manual effort

Scenario: We have to swivel chair across systems to collate data points to support security incident investigations

Behaviours:

Increased time to investigate

Response:

Utilise technology to bring the data points into a single pane of glass (SPOG) so a determination can be made and remedial action undertaken

A way forward

AARNet HR strategies

Your Action Plan

Acquire

- Review & uplift recruitment process
- Interview tools
- Set tasks
- Create Alternate pathways: Secondary School Work Experience; Graduate Programme; Cyber Academy
- Diverse education and skills acquisition

Delight

- Great offer
- Highlight benefits
- Seamless HR onboarding
- Buddy system
- Team engagement – they should never feel ‘alone’
- Immediate meaningful work
- Thank You for choosing US!

Engage

- Meaningful policies
- Open & collaborative culture
- Trust: Give licence to fail – tap their best creativity
- Diversity & Inclusion strategies
- L&D: Interest in the individual
- We Value You!

Retain

- Continual improvement of policies & Culture
- Communication at many levels
- Weekly 1:1 management touch point
- Focus on individual – not just tangible work
- Unexpected support
- Recognition

Thank You
